

## Ecological Data Search SxBRC/20/952 - Summary Report

An ecological data search was carried out for land at Dallington Forest, Heathfield on behalf of Doug Edworthy (Dallington Forest Project) on 06/04/2021.

The following datasets were consulted for this report:

	Requested	Radius/buffer size
Designated sites, habitats & ownership maps	Yes	Site only
Protected, designated and invasive species	Yes	Site only

### Summary of results

#### Sites and habitats

Statutory sites	3 SSSIs / 1 AONB
Non-statutory sites	6 LWS / 1 LGS
Section 41 habitats	3 habitats
Ancient and/or ghyll woodland	Present

#### Protected and designated species

International designations	23 species	92 records
National designations	87 species	1,431 records
Other designations	187 species	2,252 records
<b>Total</b>	<b>202 species</b>	<b>2,337 records</b>
Invasive non-native	29 species	152 records

The report is compiled using data held by Sussex Biodiversity Record Centre (SxBRC) at the time of the request. SxBRC does not hold comprehensive species data for all areas. Even where data are held, a lack of records for a species in a defined geographical area does not necessarily mean that the species does not occur there – the area may simply not have been surveyed.

**This summary page may be published.  
The full report and maps may not be published or otherwise shared.**

**The data search report is valid until 06/04/2022 for the site named above.**
